

LET'S SHAPE FUTURE TOGETHER

Sustainable Technologies
For Next Generations

ABOUT US

- Field Experience
- Continuous Development
- Technological Leadership

10+ EXPERIENCE

With over 10 years of high-tech experience, we have undertaken projects with almost zero tolerance values.

%100 HARDWARE

Our Electric Vehicle Charging Management Platform is compatible with all charging devices that support OCPP 1.6.

ADDRESSES

Ankara University Teknokent, Ankara

Ulutek Technology Development Area, Bursa

60+ PERSONEL

We work for absolute efficiency with our team of software and electronics engineers.

500+ CHARGING POINTS

It has been developed with an architecture capable of serving all charging points, which are increasing day by day in our country.

CERTIFICATES

ISO 9001, ISO/IEC 27001, TEMPEST NATO/National Facility Security, ASELSAN Approved Design, ASELSAN Strategic Partnership Document

NOT YOUR COMPETITOR

Flexible Integration: Our Software offers a **highly adaptable** structure that caters to a diverse range of needs.

Our Objective: Our core mission is to empower charging station license holders with **efficient and tailored software solutions.**

Not a Competitor to You: **We do not manufacture chargers** nor hold electric vehicle charging license.

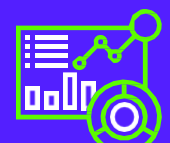

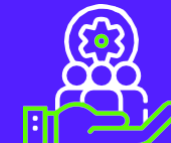

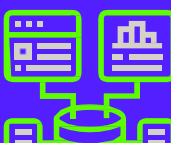

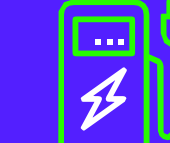

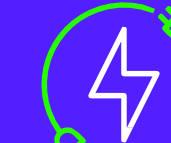

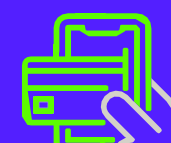

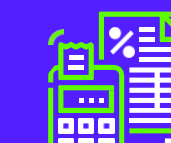

After sales Support: Our commitment to your success doesn't end with purchase. **We stand by your side, providing continuous support.**

A SNAPSHOT OF electr-INN

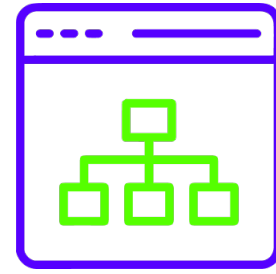

summary of electr-INN in onepage

 Reporting And Analysis	 Stakeholder and Dealer Management	 Roaming	 Notifications
 Reservation	 Data Management	 Charging Point Management	 Energy Management

Cyber Security

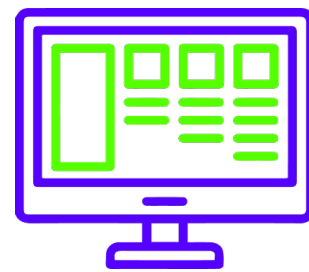

Modular System

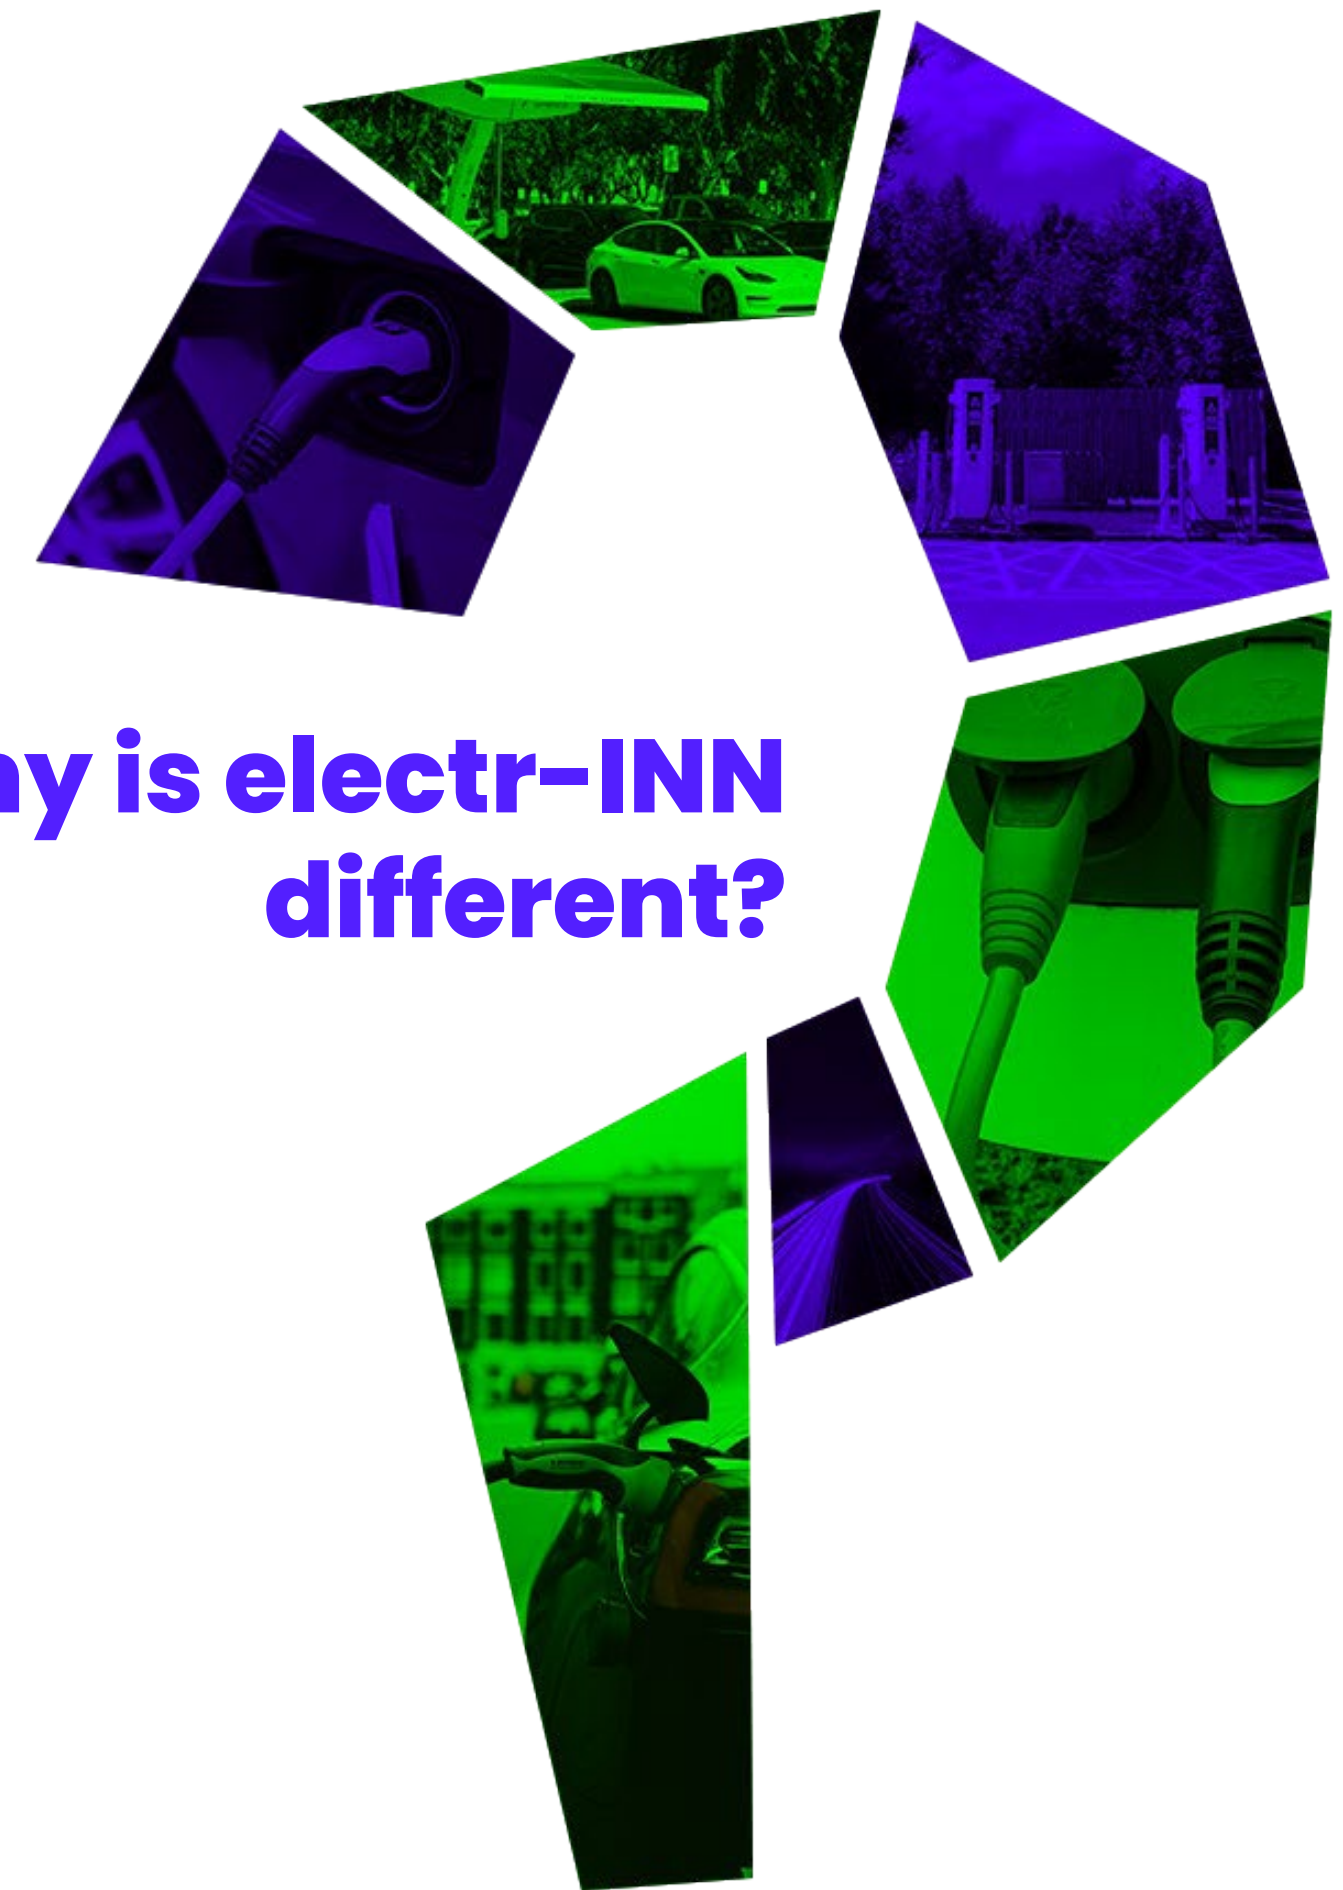

Strong Architecture

Scalable

Flexible Interface

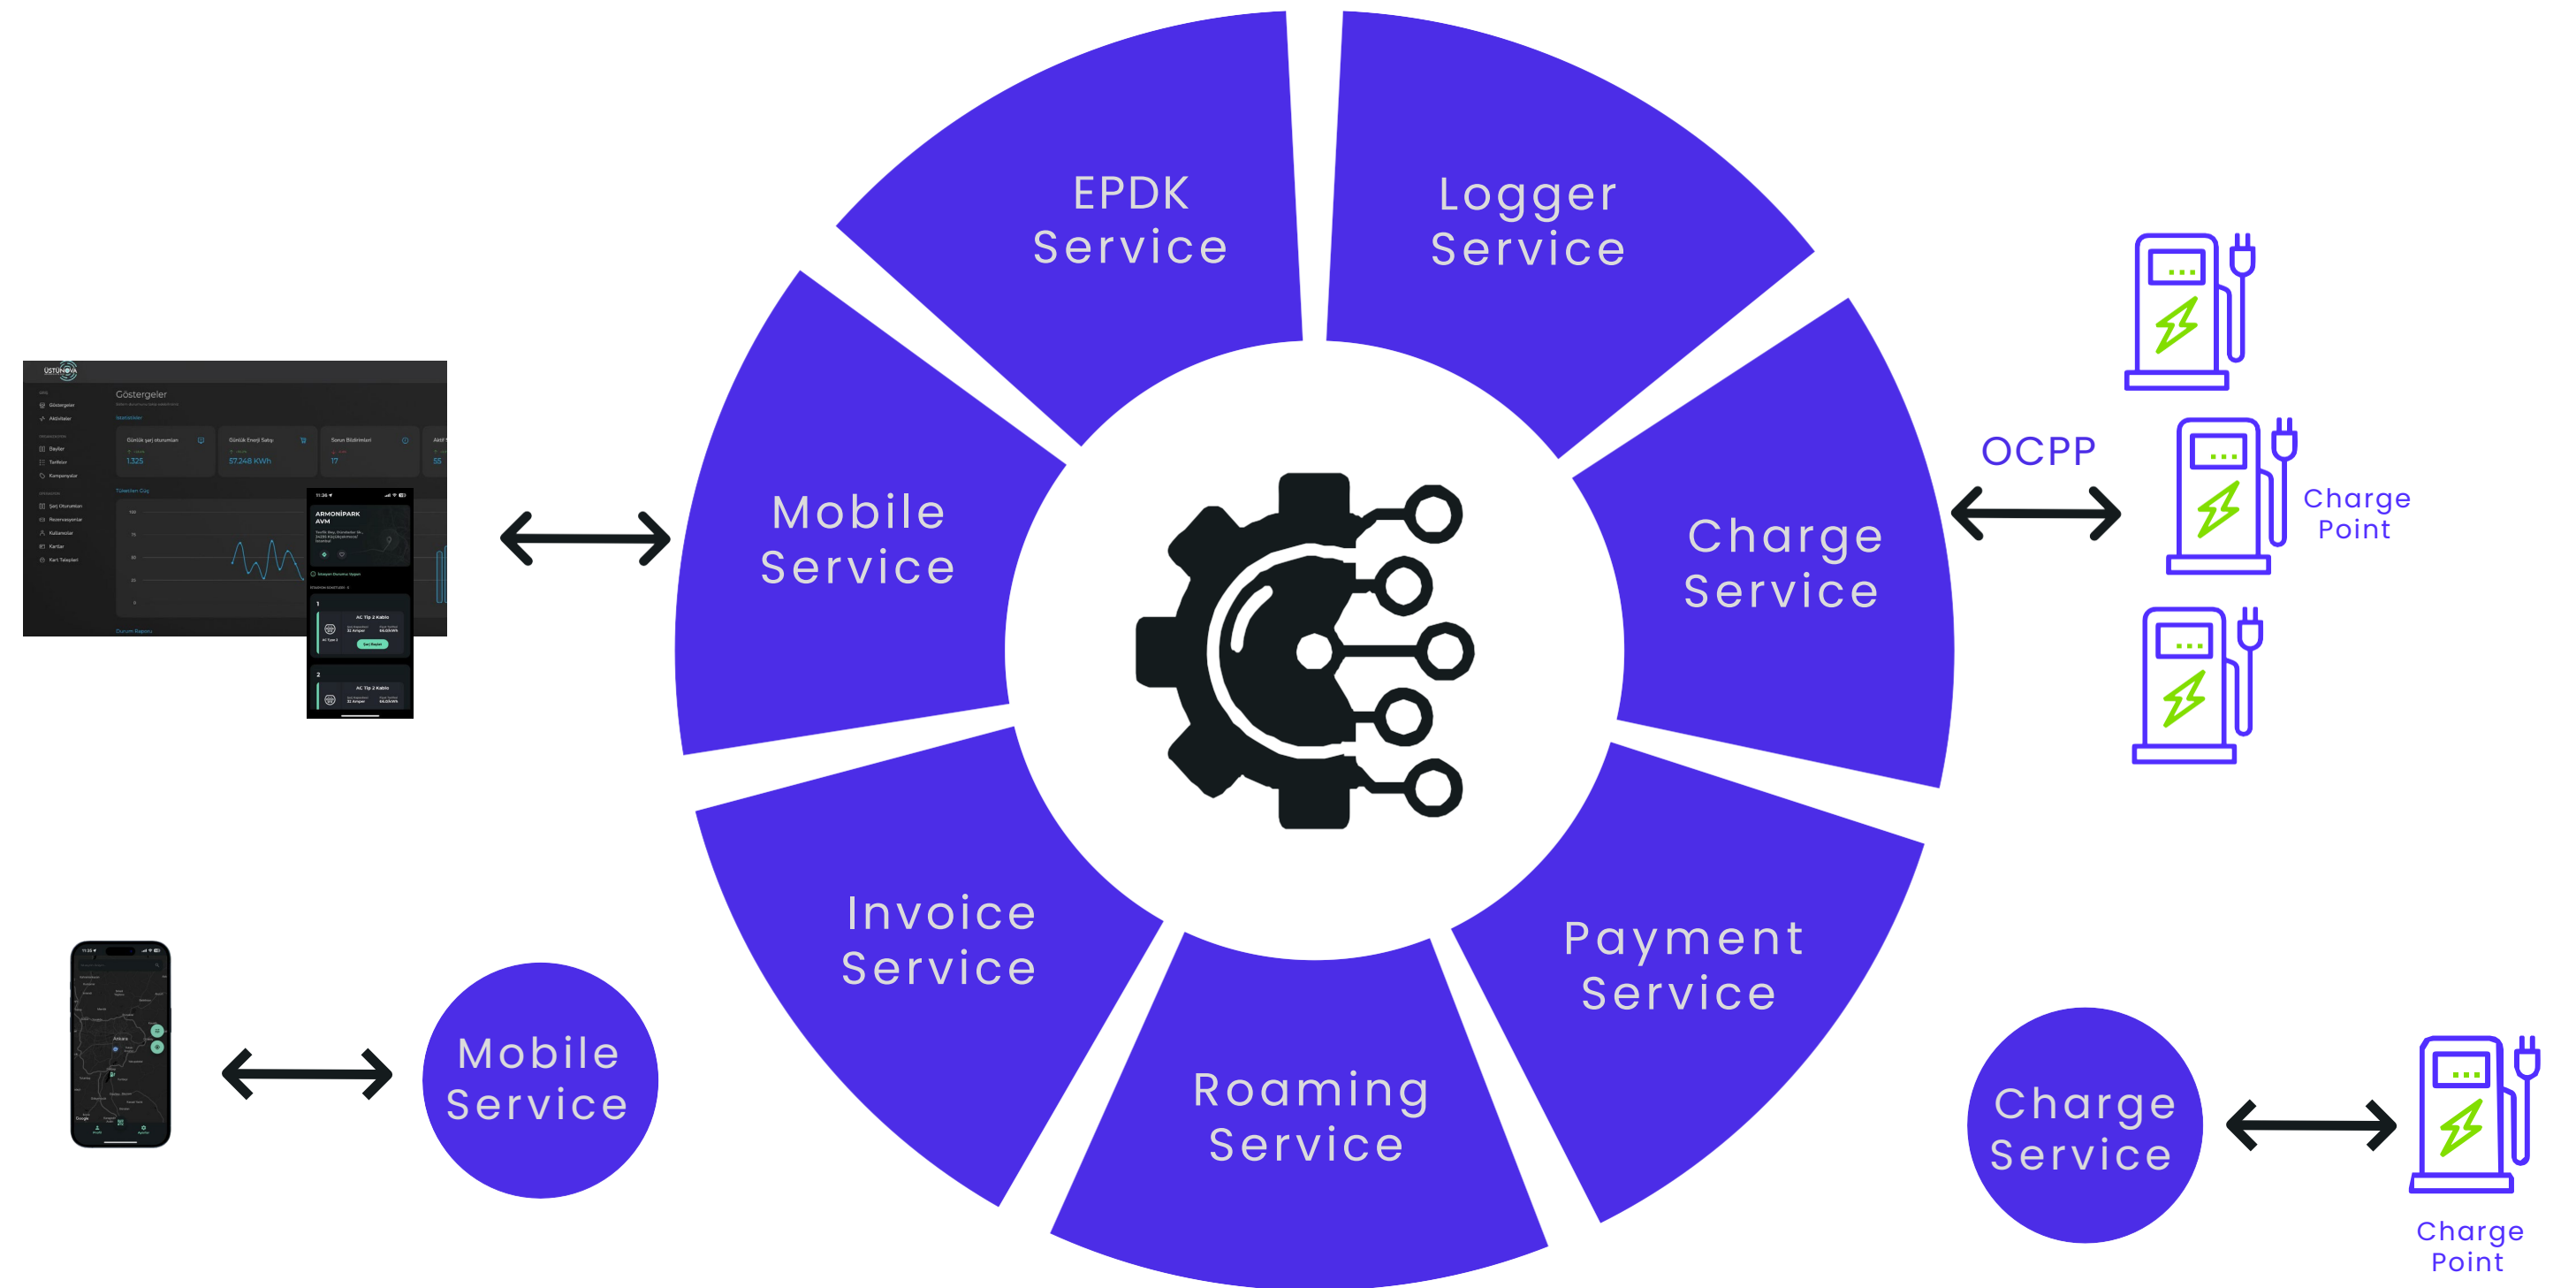

Why is electr-INN different?

SYSTEM ARCHITECTURE

Through our system, we effectively eliminate the **logging issues** that are commonly encountered in the other software.

As a result, we significantly **reduce potential challenges and achieve unparalleled customer satisfaction.**

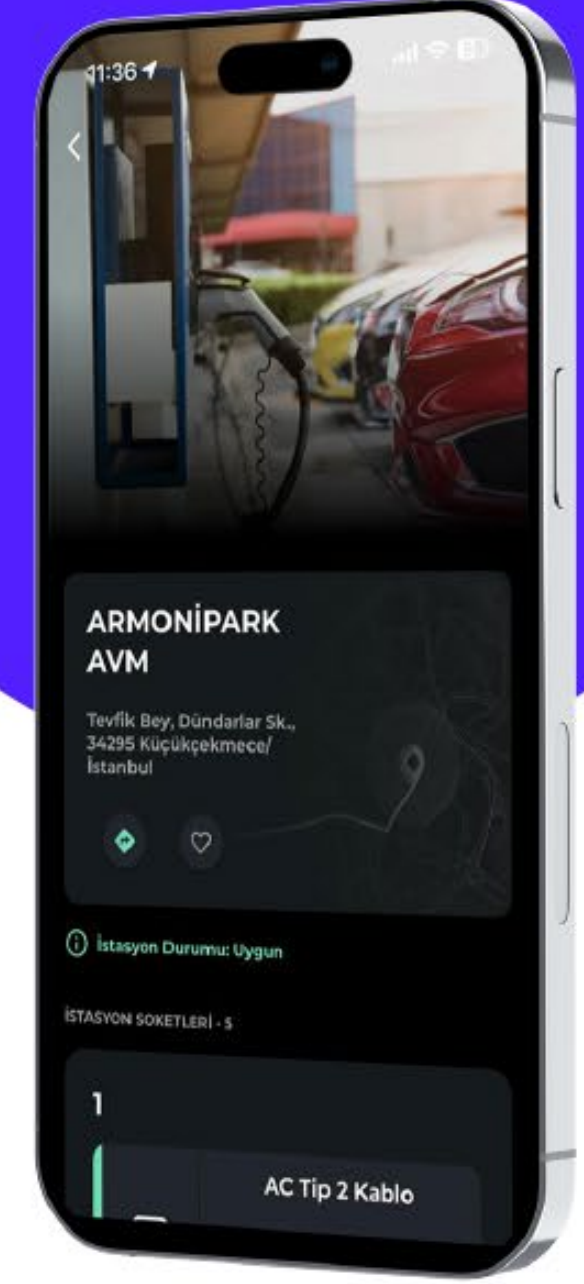

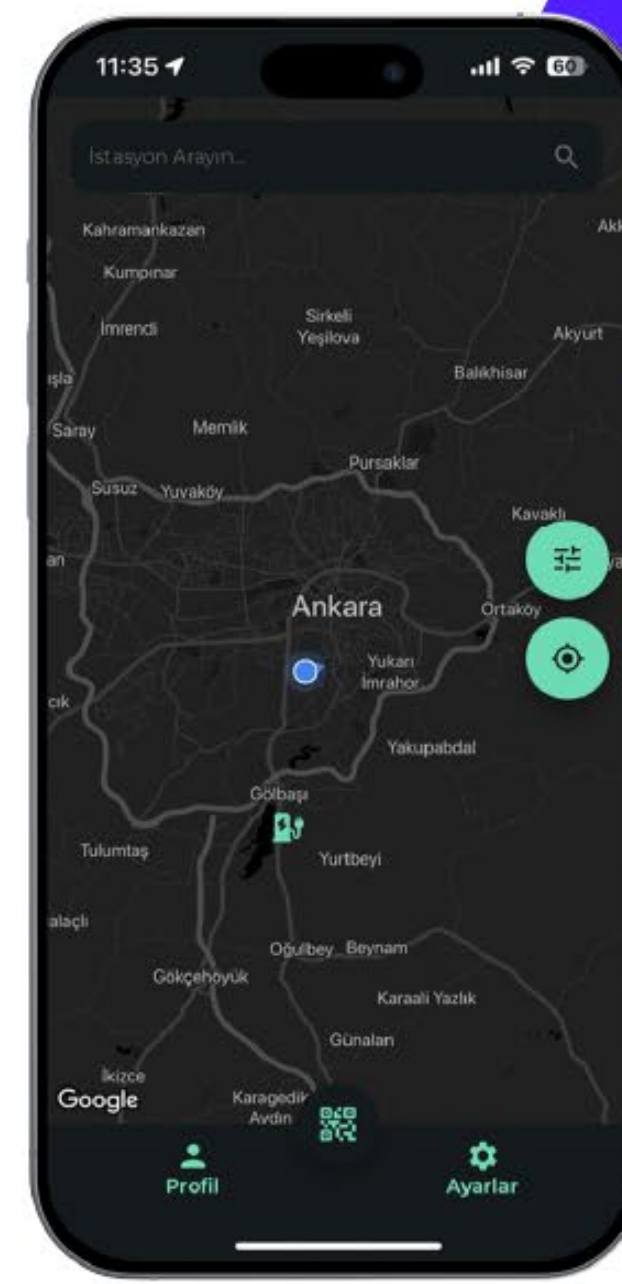

electr-INN MANAGEMENT

- Charge Point Management (Web Based)
- Management of Data of Charges
- Flexible Energy Consumption Calculation
- Payment and Invoice Management
- User Management
- Authorization Control
- Campaign and Discount Management
- Integrations (EMRA, GIB, payment gateways, e-invoicing, and SMS services)
- Reporting and Analysis (Daily, Monthly, Annually)
- Comprehensive Activity Logs
- Romaing / OCPI
- Dynamic Occupancy Pricing
- Reconciliation Reports

electr-INN MOBILE

- Instant Mapping Display
- Charging Point Activity
- RFID Card Charging Start
- Mobile App Charging Initiation
- Flexible Payment Options (Pre-payment, post-payment etc.)
- Credit Card Payments
- Credit Card Information Storage
- Instant Charging Notifications
- Reservation System
- View Past Charging Transactions
- Suggestions & Issue Reporting
- White-Label Solutions
- Stripe Management

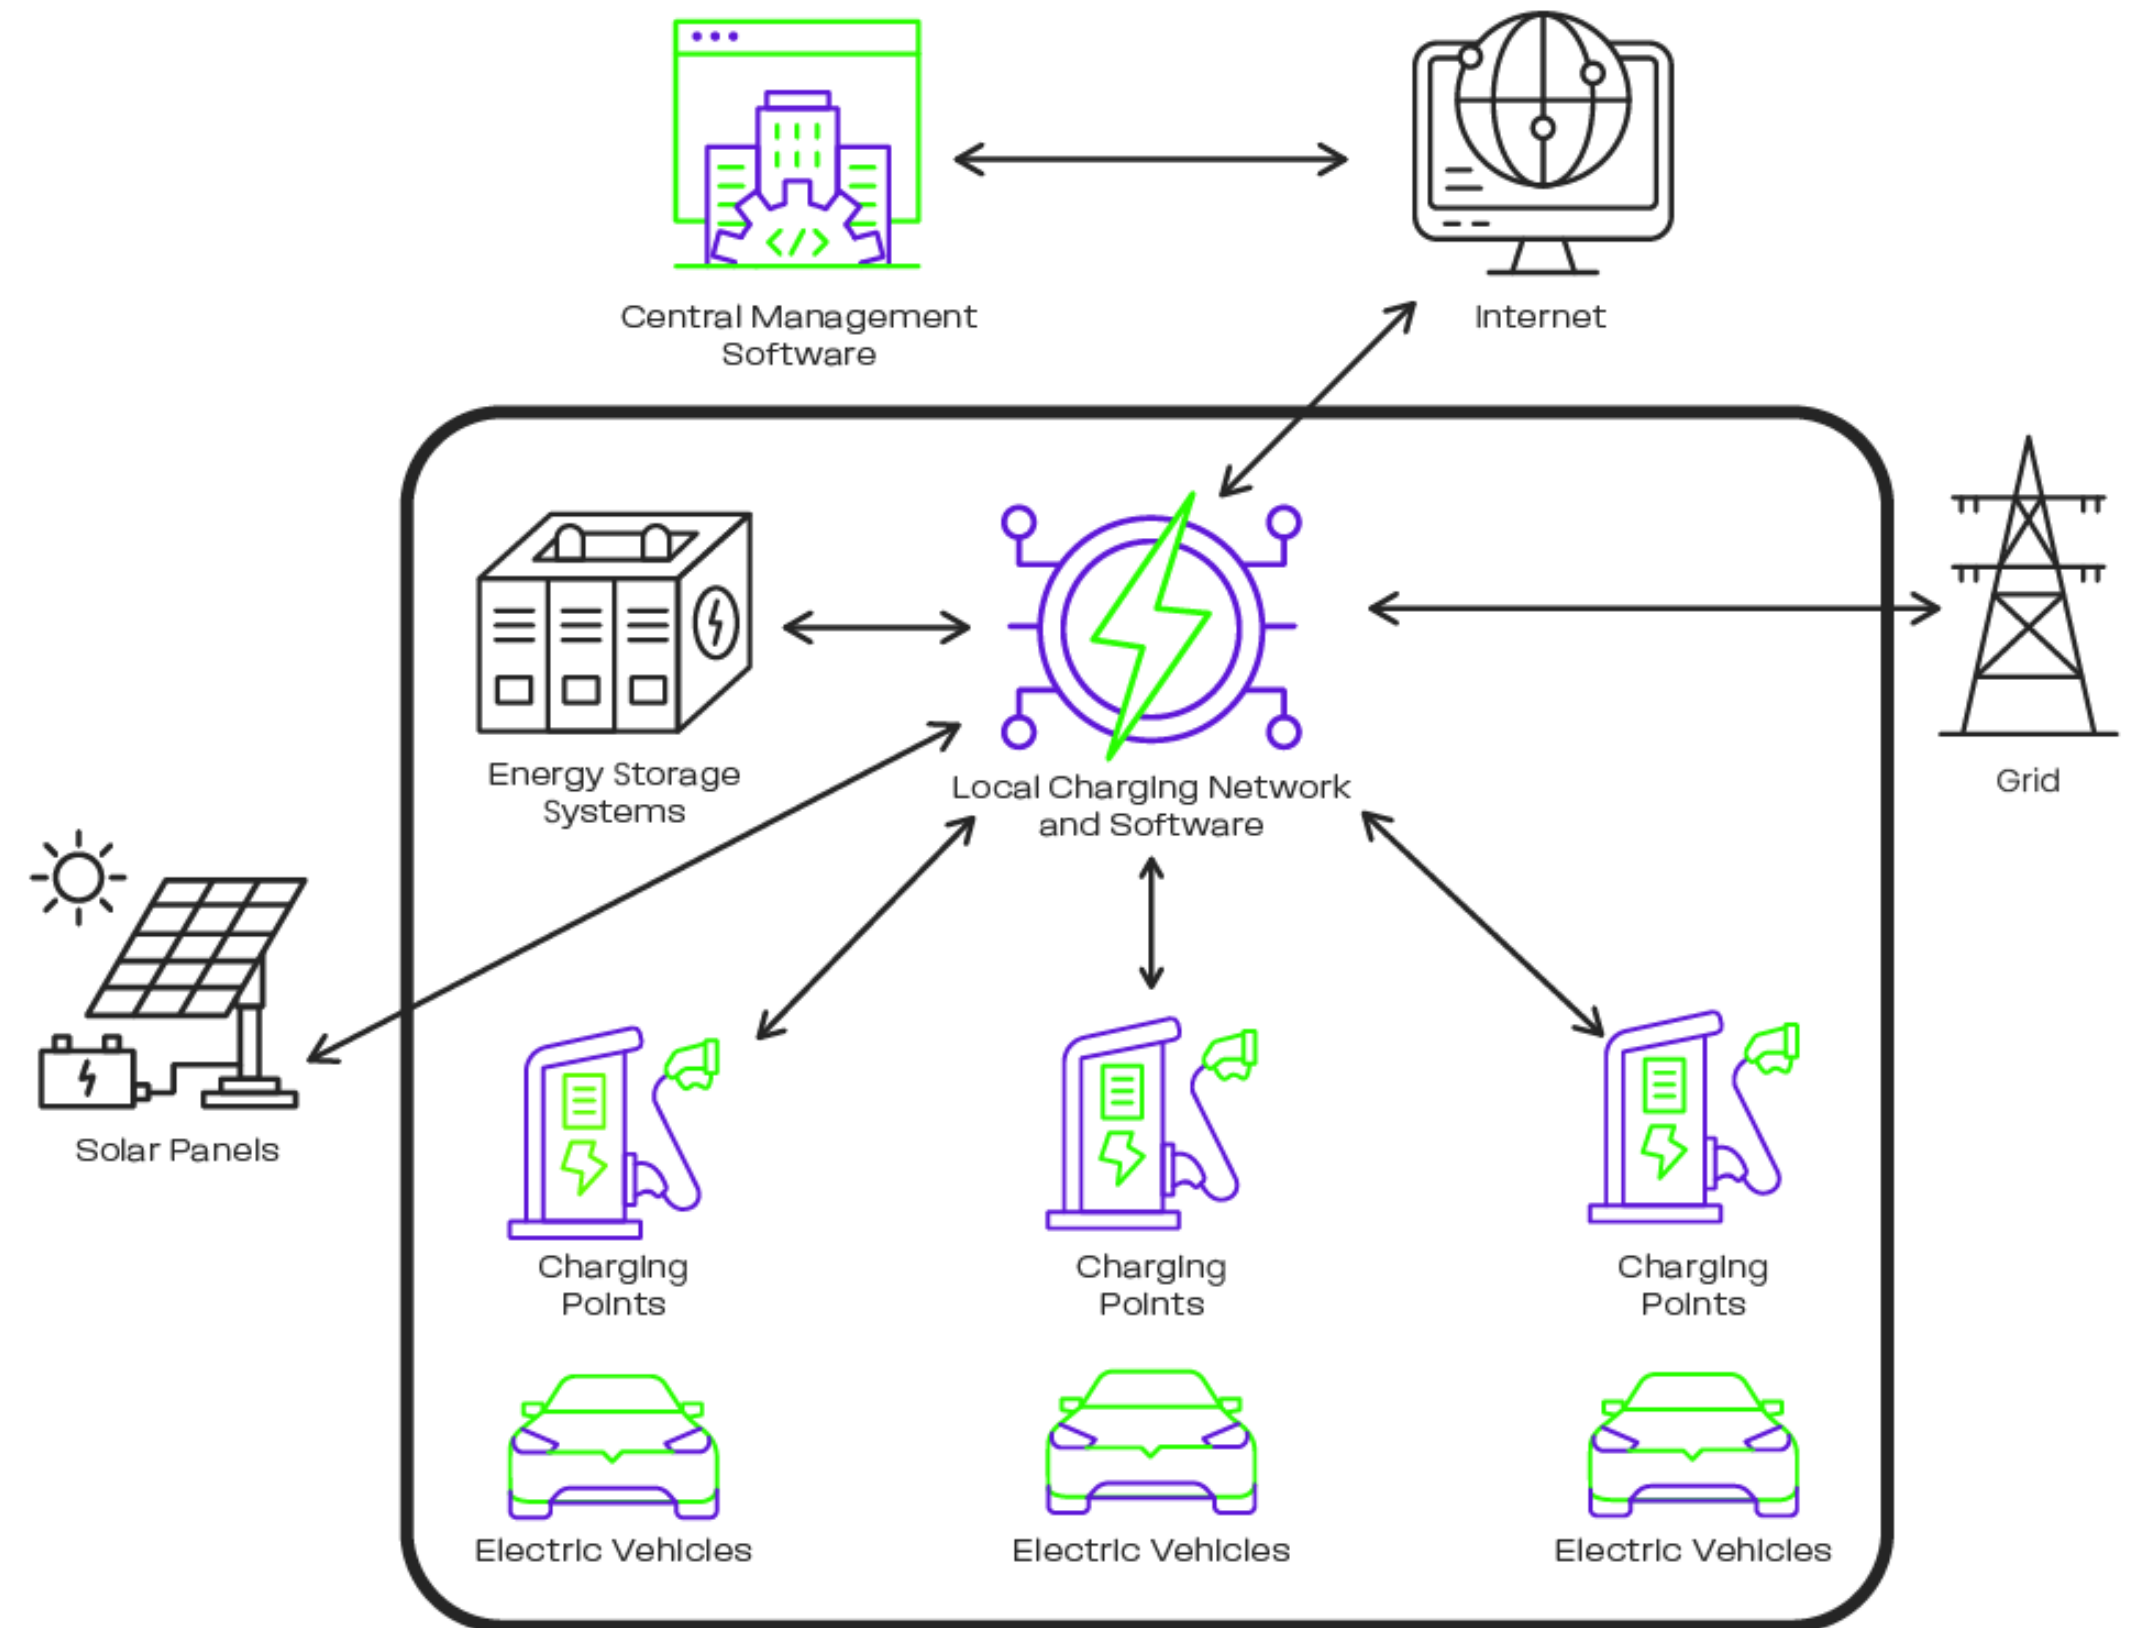

SMART ENERGY MANAGEMENT

Smart Energy Management is a **Cloud based smart charging software** that uses real-time data obtained from the communication between electric vehicles, charging stations and devices, renewable energy sources, and the grid.

PLUG&CHARGE

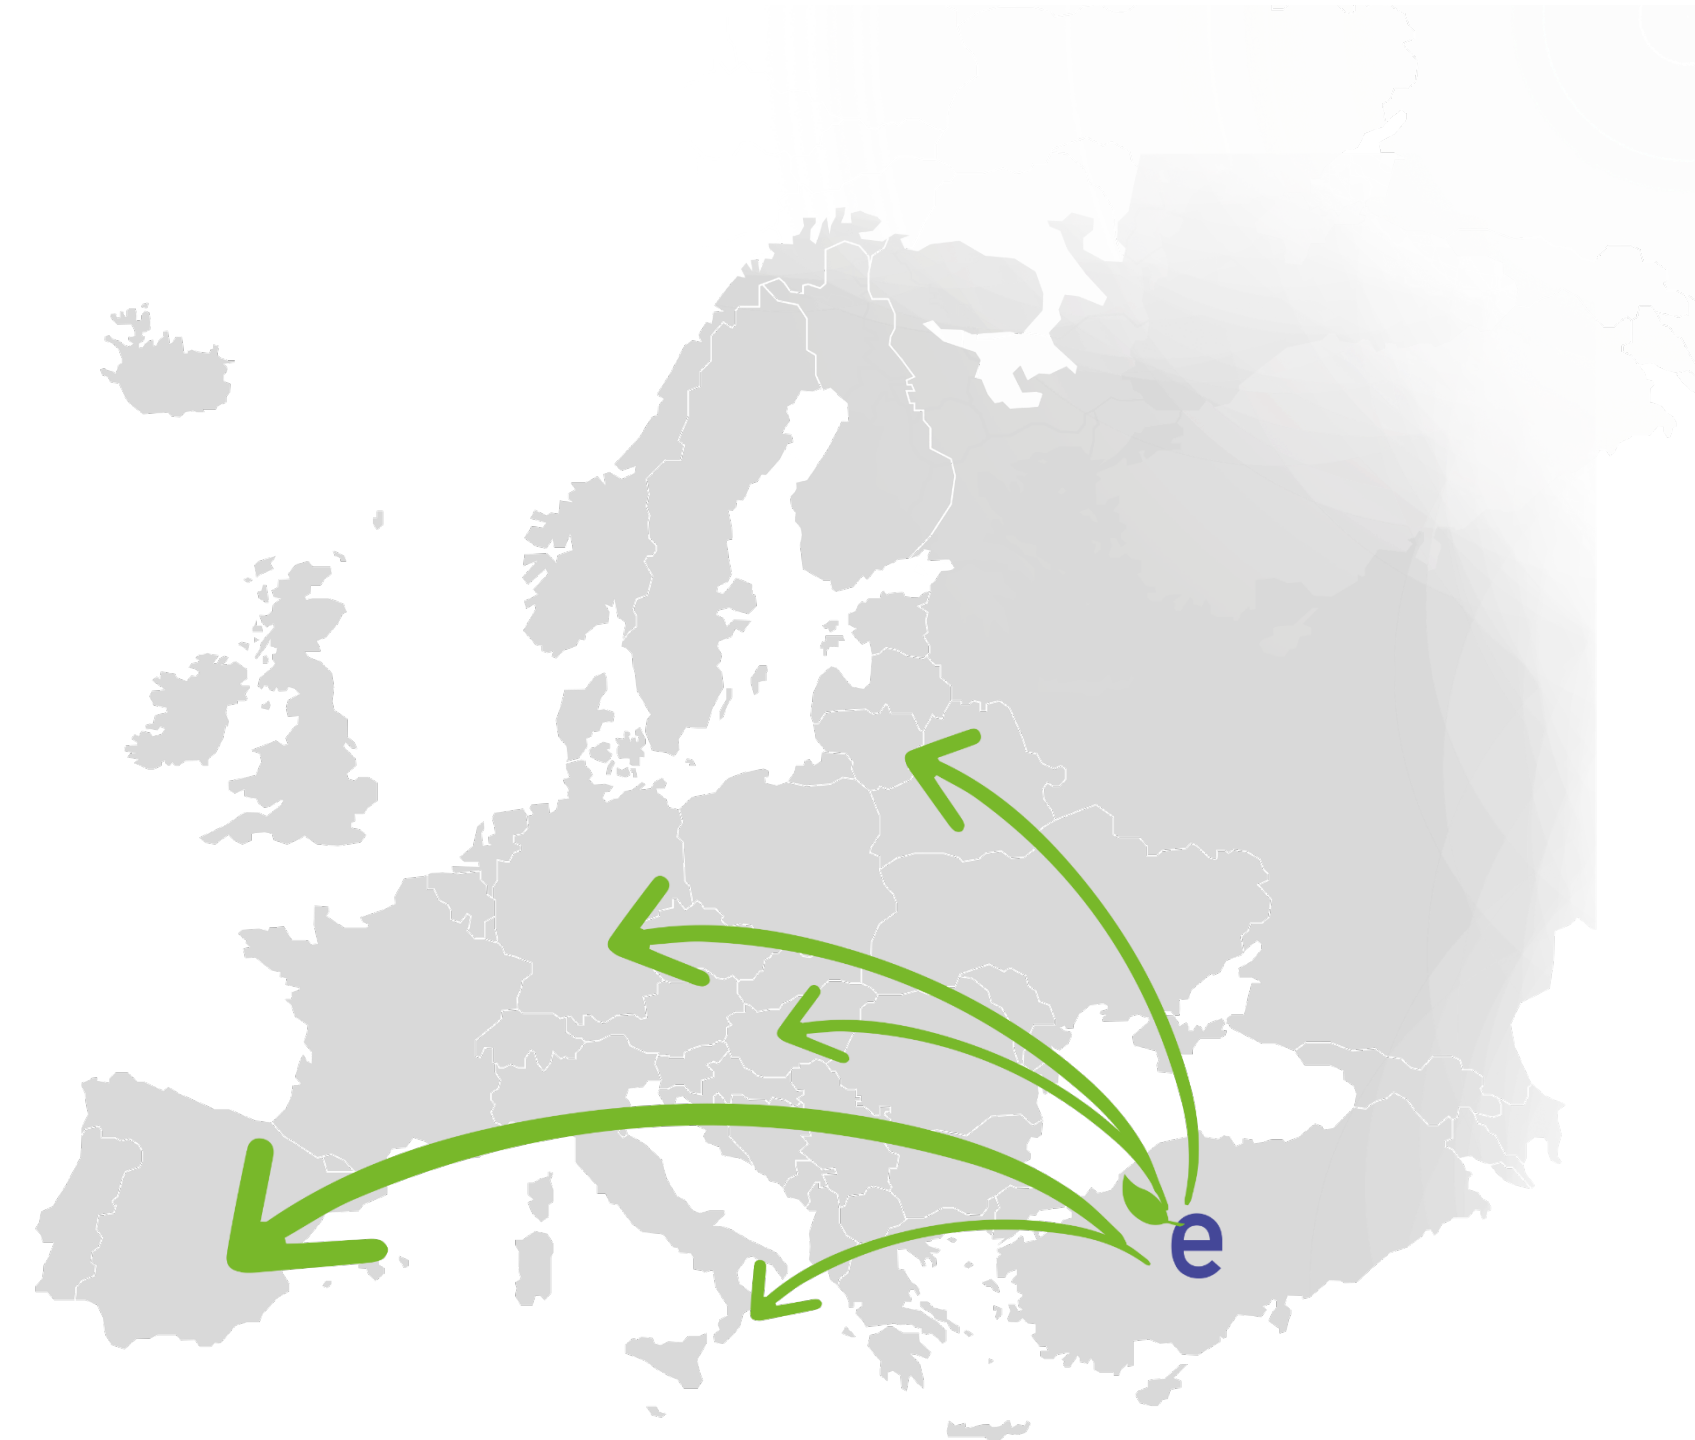

electr-INN ensures license operators, service providers, charge point operators and end users the excellent and seamless experience they demand.

Defined by OCPP 2.0.1 and ISO 15118.

Looking for Something Different and Unique?

No problem at all! With
electr-INN, every integration is
possible, and there's a solution
for every need.
